Central fotovoltaica kazaja de 20 MW + PPA GOV

Kazajstán ha avanzado mucho en el campo de las energías renovables, sobre todo con el desarrollo de centrales solares en los últimos años. Los vastos espacios abiertos del país y su abundante luz solar lo convierten en un lugar ideal para aprovechar la energía solar.

Uno de los proyectos de centrales solares más notables de Kazajstán es la Central Solar de Burnoye, situada en la región de Zhambyl. Con una capacidad de 100 MW, es una de las mayores centrales solares de Asia Central. La planta ocupa una superficie de 164 hectáreas y consta de más de 380.000 paneles solares. Se calcula que la central generará unos 153 GWh de electricidad al año, suficiente para abastecer a unos 60.000 hogares.

Otro importante proyecto de central solar en Kazajstán es la Central Solar de Sakyt, situada en la región meridional del país. Con una capacidad de 50 MW, se espera que la central genere unos 96 GWh de electricidad al año. El proyecto fue desarrollado por la empresa internacional de energías renovables Eni, y forma parte de los esfuerzos de Kazajstán por aumentar su cuota de energías renovables en la combinación energética del país.

Kazajstán se ha fijado ambiciosos objetivos para el desarrollo de las energías renovables, con la meta de generar el 10% de su electricidad a partir de fuentes renovables para 2030. El enorme potencial de energía solar del país lo convierte en un actor clave en la transición mundial hacia fuentes de energía más limpias y sostenibles.

Uno de los principales retos a los que se enfrentan los proyectos de centrales solares en Kazajstán es el duro clima del país, con temperaturas extremas y fuertes vientos que suponen riesgos potenciales para el funcionamiento de los paneles solares. Sin embargo, los avances en la tecnología de los paneles solares y la implantación de sistemas de redes inteligentes han contribuido a mitigar estos retos.

En general, los proyectos de centrales solares en Kazajstán tienen potencial para desempeñar un papel crucial en la transición energética del país, reduciendo su dependencia de los combustibles fósiles y contribuyendo a un futuro más sostenible. Con una inversión y un apoyo continuados tanto del gobierno como del sector privado, Kazajstán está bien posicionado para convertirse en líder de las energías renovables en Asia Central.

Puntos clave

Tipo de proyecto: FV en Terreno Libre

Estado: Listo para construir

Ubicación: Zhetisu, Kazajstán

Superficie total: 100 Ha

Derechos sobre el terreno: Arrendamiento (Incluido en el precio)

Potencia instalada: 20,00 MW

Energía específica (aproximada) 1390,9 kWh/kWp

Conexión a la red: A 3 km de la subestación KEGOC

Costes EPC aproximados: 450.000 EUR / MW

PPA: GOV PPA por 14,50 KZT (0,0022\$ POR kW)

BUSINESS TYPE

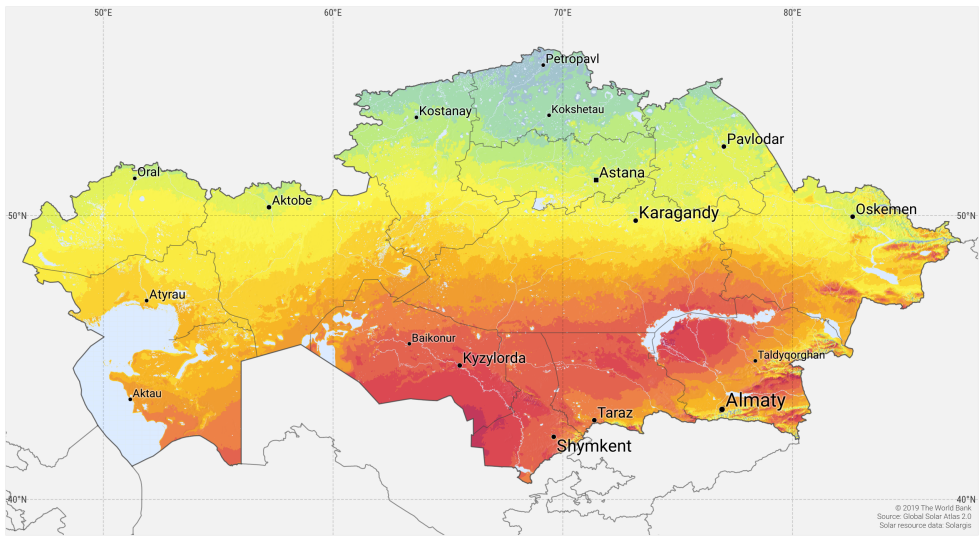

Energías renovables

COUNTRY

Kazajstán

BUSINESS ID

L#20240632

The information contained herein does not constitute an offer to sell or a solicitation of an offer or a recommendation to purchase securities under the securities laws of any jurisdiction, including the United States Securities Act of 1933, as amended, or any US state securities laws, or a solicitation to enter into any other transaction

The projected financial information contained in the Memorandum is based on judgmental estimates and assumptions made by the management of the target Company, about circumstances and events that have not yet taken place. Accordingly, there can be no assurance that the projected results will be attained. In particular, but without prejudice to the generality of the foregoing, no representation or warranty whatsoever is given in relation to the reasonableness or achievability of the projections contained in the Memorandum or in relation to the bases and assumptions underlying such projections and you must satisfy yourself in relation to the reasonableness, achievability and accuracy thereof.

By delivering this Memorandum, neither MergersUS Inc., nor its authorized agents are making any recommendations regarding the acquisition or strategies outlined herein. Interested parties shall exercise independent judgment in, and have sole responsibility for, determining whether an acquisition of the Company is suitable for them, and neither MergersUS Inc, nor its authorized agents have responsibility to, and will not, monitor the condition of interested parties to determine that an acquisition is or remains suitable for them. Among other things, suitability of an acquisition will depend upon an interested party's investment and business plans and financial situation.

This document is prepared for information purposes only. It is made available on the express understanding that it will be used for the sole purpose of assisting the recipients to decide whether they wish to proceed with a further investigation of the Proposed Transaction.

The recipients realize and agree that this document is not intended to form the basis of any investment decision or any other appraisal or decision regarding the Proposed Transaction, and does not constitute the basis for the contract which may be concluded in relation to the Proposed Transaction.

All information contained in this document may subsequently be updated and adjusted. MergersUS Inc. has not independently verified any of the information contained herein or on which this document is based. Neither the Company, nor its management or shareholders, nor MergersUS Inc. , nor any of their respective directors, partners, officers, employees or affiliates make any representation or warranty (express or implied) or accept or will accept any responsibility or liability regarding or in relation to the accuracy or completeness of the information contained in this document or any other written or oral information made available to any interested party or its advisers. Any liability in respect of any such information or any inaccuracy in or omission from the document is expressly disclaimed.
