

Central solar fotovoltaica de 25 MWp

Central solar fotovoltaica de 25 MWp

La industria fotovoltaica (FV) de Croacia no ha dejado de crecer, impulsada por el compromiso del país con las energías renovables y su clima favorable, con una elevada irradiación solar a lo largo de la costa y en las zonas del interior. Croacia pretende aumentar la proporción de energías renovables en su combinación energética, en consonancia con los objetivos climáticos de la UE de alcanzar la neutralidad de carbono para 2050. La situación geográfica del país lo convierte en un emplazamiento ideal para proyectos de energía solar, sobre todo en regiones como Split-Dalmacia, que recibe hasta 1.500-1.700 kWh/m² de radiación solar al año.

Históricamente, el mercado fotovoltaico croata era relativamente pequeño, pero los recientes cambios políticos han fomentado una mayor inversión en el sector. La introducción de tarifas de alimentación (FiT), subvenciones y un proceso simplificado de concesión de permisos ha apoyado el desarrollo de proyectos solares. Como resultado, se han propuesto o se están construyendo varias centrales fotovoltaicas a gran escala, incluidos proyectos de entre 10 y 50 MWp.

El Plan Nacional de Energía y Clima (NECP) del gobierno croata prevé un aumento de la capacidad solar instalada para ayudar a cumplir los objetivos de energía renovable del país. Además, el Green Deal de la Unión Europea proporciona respaldo financiero, incentivando aún más a los inversores internacionales y locales a explorar el potencial solar del país.

Siguen existiendo retos, como los cuellos de botella normativos y los problemas de conexión a la red, pero el futuro parece prometedor para la industria fotovoltaica en Croacia.

Puntos clave

- Capacidad del proyecto: 25 MWp (CC), con conexión a 20 MW (CA).
- Ubicación: Un terreno de 25 hectáreas propiedad del Estado en régimen de arrendamiento gubernamental a largo plazo (hasta 50 años).
- Conexión a la red: Conexión de 110 kV TS que requiere la construcción de una línea de 8 km con un coste estimado de 900.000 euros.
- Producción estimada: Unos 1470 kWh/kWp, con un coeficiente de rendimiento del 80%.
- Fase de desarrollo: Permiso energético completado, evaluación de impacto ambiental (EIA) completada y estudio de conexión a la red finalizado. La red y los permisos de construcción están previstos para el tercer trimestre de 2025.
- Oportunidad de negocio: La sociedad del proyecto o SPV está disponible para la compra por inversores, con precios para la fase actual o RTB (lista para construir) que oscilan entre 930.000 y 1.280.000 euros.

The information contained herein does not constitute an offer to sell or a solicitation of an offer or a recommendation to purchase securities under the securities laws of any jurisdiction, including the United States Securities Act of 1933, as amended, or any US state securities laws, or a solicitation to enter into any other transaction

The projected financial information contained in the Memorandum is based on judgmental estimates and assumptions made by the management of the target Company, about circumstances and events that have not yet taken place. Accordingly, there can be no assurance that the projected results will be attained. In particular, but without prejudice to the generality of the foregoing, no representation or warranty whatsoever is given in relation to the reasonableness or achievability of the projections contained in the Memorandum or in relation to the bases and assumptions underlying such projections and you must satisfy yourself in relation to the reasonableness, achievability and accuracy thereof.

By delivering this Memorandum, neither MergersUS Inc., nor its authorized agents are making any recommendations regarding the acquisition or strategies outlined herein. Interested parties shall exercise independent judgment in, and have sole responsibility for, determining whether an acquisition of the Company is suitable for them, and neither MergersUS Inc, nor its authorized agents have responsibility to, and will not, monitor the condition of interested parties to determine that an acquisition is or remains suitable for them. Among other things, suitability of an acquisition will depend upon an interested party's investment and business plans and financial situation.

This document is prepared for information purposes only. It is made available on the express understanding that it will be used for the sole purpose of assisting the recipients to decide whether they wish to proceed with a further investigation of the Proposed Transaction.

The recipients realize and agree that this document is not intended to form the basis of any investment decision or any other appraisal or decision regarding the Proposed Transaction, and does not constitute the basis for the contract which may be concluded in relation to the Proposed Transaction.

All information contained in this document may subsequently be updated and adjusted. MergersUS Inc. has not independently verified any of the information contained herein or on which this document is based. Neither the Company, nor its management or shareholders, nor MergersUS Inc. , nor any of their respective directors, partners, officers, employees or affiliates make any representation or warranty (express or implied) or accept or will accept any responsibility or liability regarding or in relation to the accuracy or completeness of the information contained in this document or any other written or oral information made available to any interested party or its advisers. Any liability in respect of any such information or any inaccuracy in or omission from the document is expressly disclaimed.
