Activo tecnológico de seguridad móvil

Una oportunidad para adquirir un activo tecnológico de seguridad móvil patentado centrado en la escalada de emergencia automatizada en situaciones en las que un usuario no puede manejar físicamente su smartphone.

La plataforma es un motor de escalada Auto-SOS basado en Android y en el dispositivo, diseñado para mejorar la seguridad personal mediante la automatización inteligente de la respuesta a emergencias. A diferencia de las aplicaciones móviles convencionales, la tecnología funciona como una capa de seguridad proactiva capaz de iniciar flujos de trabajo de escalada cuando el usuario deja de responder.

El activo no se está posicionando como un negocio tradicional de flujo de caja; los ingresos actuales son limitados, y el valor principal es la aplicación Android transferible, el código fuente, el motor de escalada Auto-SOS en el dispositivo y el flujo de trabajo del producto. Un comprador puede utilizar la aplicación existente, integrar el motor en un producto de seguridad existente, empaquetarlo como un SDK o adaptarlo como una capacidad de seguridad a nivel de OEM / dispositivo.

Funciones básicas

El sistema está diseñado para:

- Activa una cuenta atrás de confirmación durante un evento de emergencia potencial
- Detectar la ausencia de interacción o respuesta del usuario
- Escalar automáticamente mediante notificaciones SMS que contengan la última ubicación conocida del usuario
- Inicia opcionalmente llamadas de voz automatizadas a contactos de confianza previamente designados
- Funciona directamente en el dispositivo para mejorar la capacidad de respuesta y la fiabilidad

Valor estratégico

El activo puede ser muy relevante para:

- Desarrolladores de aplicaciones móviles
- Empresas de tecnología de seguridad personal
- Plataformas empresariales de seguridad laboral
- Proveedores de telecomunicaciones
- OEM / fabricantes de dispositivos smartphone
- Movilidad conectada y ecosistemas de dispositivos inteligentes

Esta tecnología responde a la creciente demanda mundial de seguridad personal, protección de trabajadores solitarios, automatización de emergencias y sistemas inteligentes de respuesta móvil.

Alcance de la transacción

El paquete de transferencia propuesto puede incluir:

- Propiedad total del código fuente
- Arquitectura del proceso central y lógica del flujo de trabajo
- Documentación de construcción y publicación
